

# The **HEAVY DUTY** *Light Weight* C o r r u g a t e d P a l l e t

## The Alternative To Wood

Weighing only 10 lbs, the medium duty design of this pallet is carrying over 2,300 lbs single pallet load. The die cut corrugated sheets are folded then interlocked using no glue! This patented design is unique!

Our corrugated pallets are light weight and therefore the best choice for exporting. At 1/4 the weight of an average wooden pallet, they are by far the cheapest way to ship airfreight.

Being lightweight, customers and employees will find these pallets easy to handle and with no splinters, no nails, or sharp corners, they can avoid accidents and back injuries.

Paper recyclers will provide you with a receptacle, pick it up when you call, and pay you a per lb price for all your corrugated waste.

The pallets can bring up to .50 each from the recyclers.

The heavy duty design of this pallet can easily carry 3,000+ lbs. We have loaded 15,990 static lbs on this heavy duty pallet successfully!

The pallet can be customized to fit your weight requirements by using different paper combinations in the corrugated board. Regardless of your particular needs, we specialize in finding you the best, money saving alternatives.

Find out how much you can save, request a free quote today!

- ◆ Most economical way to ship export
- ◆ Savings approaching 75% over wood on airfreight
- ◆ ISPM15 exempt - no paperwork needed
- ◆ Custom designs available
- ◆ Can be preassembled or do-it-yourself and save
